

European Conference on “Global Change and Marine Ecosystems” 25-27 November 2008

Detailed Agenda of the “Marine Biogeochemistry” session

Date - Hour	Présentations	
Wednesday 26 November 2008 09:30-10:30	Souvermezoglou Ekaterini	“Trends of nutrients and nutrient ratios in the deep water of Eastern Mediterranean Sea during 1986 - 2006 ”
	Larkin Kate	Biogeochemical time-series from European deep ocean observations: A regional approach
	Pidcock Rosalind	High resolution biogeochemistry in an Iceland Basin eddy dipole
	García-Martín Enma Elena	The use of oxygen microsensors to test potential bias in respiration rates by dark bottle incubation
Wednesday 26 November 2008 17:15-18:30	Simo Rafel	The DMS-GO Integration Project to update the global surface-ocean DMS climatology
	Fonda Serena	Carbon fluxes in the pelagic ecosystem of the Gulf of Trieste (Northern Adriatic Sea) MS
	Goutx Madeleine	Particle flux: Control at short time scale
	Echeveste Pedro	Lethality of Polycyclic Aromatic Hydrocarbons (PAHs) to marine phytoplankton: higher sensitivity of Atlantic and Mediterranean communities than cultured phytoplankton
Thursday 27 November 2008 15:55-16:55	Augustin Christina	Impact of phosphate depleted diet on ingestion and growth rates of copepod nauplii
	Cattaneo Raffaella	Physical-biological interactions between Black Carbon particles and microbes in marine coastal waters
	Nugraha Adi	Role of upper trophic levels on deep ocean N:P ratio
