

European Conference on “Global Change and Marine Ecosystems” 25-27 November 2008

Detailed Agenda of the “Impact of Global Change on Marine Ecosystems” session

Date; hour	Presentations	
Tuesday 25 November 2008 16:45-18:15	Hop Haakon	Arctic melt-down with consequences for marine food webs
	Joos Fortunate	Ocean variability, climate change and Arctic acidification in the NCAR climate-carbon model
	Lasternas Sebastien	Ice melting impacts on pelagic arctic production: recent evidence from field observations.
	Regaudie de Gioux Aurore	Patterns in the Metabolic balance of the Ocean
	Martynova Daria	Climate change effects on life cycle patterns of <i>Calanus glacialis</i> (Copepoda, Calanoida) in three different areas in the Arctic
Wednesday 26 November 2008 11:00-12:30	Ojaveer Henn	Mesozooplankton dynamics in the Gulf of Riga (Baltic Sea): evidence of impact of climate change and human forcings
	Micheli Carla	Seagrass biodiversity and global change
	Rees Andy	The Atlantic Meridional Transect (AMT)
	Le Quéré Corinne	First results from the MARine Ecosystem Model Inter-comparison Project (MAREMIP)
	Aumont Olivier	To be decided
Thursday 27 November 2008 09:30-10:30	Brunelli Federico	Global change and management of european protected area; experience in the delta of po river
	Marcelli Marco	ADRICOSM-STAR Project: T-FLAP upgrade
	Woods John	The Virtual Ecology Workbench
	Ogbonna James	Focus on global change on 21 century
